

Amgen Canada Grants Program Grant Review Criteria

The Amgen Grant Review Committee (GRC) will consist of the following individuals:

- CANNT president
- Regional Vice Presidents (4)
- Vice President of Technologists

Review Process:

Each member of the GRC will review the applications based on outlined criteria. Written comments will be limited to 500 – 1000 characters as per the Program Charter. The GRC considers the following criteria when evaluation applications and proposals:

Significance – The potential to build on existing knowledge that will improve nephrology practice, education or patient care.

Research Quality – This include clarity of the rationale, hypothesis and objective, strengths and weakness of the experimental design and feasibility of project completion.

***note** – if the application is not for a research project, is the rationale for the project clearly defined and have they clearly outlined the objectives and plan.

Applicant Qualifications – Demonstrated support for (via written reference) or experience that predicts successful completion of the project.

Budget – Feasibility of project completion with proposed budget.
